

DESIGN FREELY IN METAL

GIVE EACH SURFACE

A UNIQUE CHARACTER

VeroMetal[®]
AquaFill

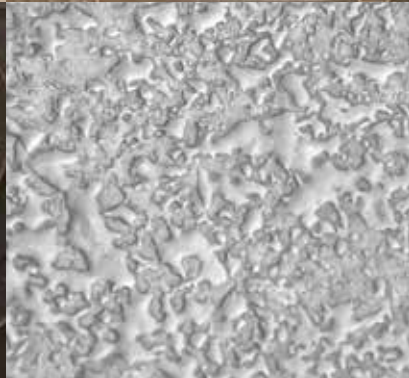

VeroMetal[®] AquaFill metal stucco

VeroMetal[®] AquaFill is a metal stucco that can be applied to practically any surface.

After application, VeroMetal[®] AquaFill bears all the optical and physical properties of the metal in question. Sanding, polishing, patinating or oxidising creates a unique final finish. A silky lustrous appearance or an antiquated and weathered look, everything is possible with VeroMetal[®] AquaFill. Each wall or floor takes on a characteristic metal look.

VeroMetal[®] AquaFill adheres well to practically any type of surface. It does not crack or peel away. Since VeroMetal[®] AquaFill is odor-free, it leaves no unpleasant smells after applying. VeroMetal[®] AquaFill metal stucco is easy to clean and maintain. Damaged surfaces may even be restored, depending on the gloss level of the finish.

Extensive range

VeroMetal® AquaFill is available in many different kinds of metal, such as brass, bronze, copper, 'gold', iron, nickel-silver and zinc. Every metal can be processed in various ways, such as by brushing, polishing and weathering. Each result is unique!

Would you like an introduction to all of our metals and finishes? Then please visit our website www.VeroMetal.com and see the 'metals & finishes' page. For an overview of designs with VeroMetal® AquaFill, please go to 'gallery'.

Luxurious design

Authorised application specialists

Our ultimate goal is a fantastic final result for all projects where VeroMetal® AquaFill is used. To achieve this, we collaborate with a carefully vetted network of authorised installers. VeroMetal® AquaFill installers are well-trained and qualified.
